PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in building scalable full-stack applications using React.js, Next.js, Node.js, and MongoDB. Strong foundation in Java and data structures, with experience implementing secure authentication and database-level security (RLS). Passionate about developing efficient, real-world software solutions.

WORK EXPERIENCE

NUTAN TECHNOLOGY

Oct 2025 - Present

Software Development Engineer

- Developed and maintained full-stack web applications using React.js, Node.js, and MongoDB, improving application performance and user experience.
- Built responsive and user-friendly UI components following modern design principles.
- Implemented form validation, authentication, and database integration for secure user management.
- Deployed applications and managed version control using Git and GitHub.

Manav Rachna Innovation and Incubation Center

Feb 2025 - May 2025

Web Developer

- Designed and developed responsive web applications using React.js with reusable component-based architecture.
- Implemented state management and dynamic UI rendering to build scalable frontend applications.
- Built mobile-responsive, cross-browser compatible applications using Bootstrap.
- Worked in an Agile environment using Git for version control, debugging, and performance optimization.

PROJECTS

TaskFlow (Live) Next.js, TypeScript, Node.js, MongoDB, Tailwind CSS, Socket.io

- Built a task management SaaS platform with secure organization-level data isolation and RBAC (Super Admin, Manager, Team Lead, Employee).
- Developed real-time task discussions, chat, and @mentions using Socket.io for team collaboration.
- Created role-specific dashboards and invite-based onboarding with secure, self-managed credentials.
- Added subtasks, recurring tasks, file attachments, activity logs, and private notes to improve productivity.

VandeIOT - IOT Dashboard Integration (Live) React.js

- Built an IoT-based smart monitoring system using ESP32 and MongoDB, enabling real-time sensor tracking with REST API integration and dynamic React dashboard visualization.
- Developed REST APIs for device data handling and integrated MongoDB for storage.
- Created a dynamic dashboard for tracking sensor readings and system status.

TECHNICAL SKILLS

Languages Java, JavaScript, TypeScript, HTML5, CSS3

Frameworks React.js, Next.js, Node.js, Bootstrap

Databases MySQL, MongoDB

Tools Git, GitHub, Postman, Android Studio, Firebase, Supabase, Socket.io

EDUCATION

B-Tech in Computer Science, Manav Rachna International Institute Of Research and Studies

June 2025

CGPA: 7.95
